➤ DAS: TOWARDS A SUSTAINABLE FUTURE

Dynamic Abutment® Solutions continues believing in a more sustainable world and takes a step further regarding renewable energies. That is the reason why we have recently installed photovoltaic panels in our head-quarters in order to increase our facilities' electrical self-sufficiency.

Harnessing a clean, renewable and inexhaustible energy source such as the solar one is part of our strategy to reduce our carbon footprint and become more respectful towards the environment. In this sense, we are committed to doing our utmost to use natural resources responsibly and to continue searching for new ways of doing so.
