DYNAMIC ABUTMENT® SOLUTIONS

“
1st
DENTALCOOP/
HUMANCOOP
COMMISSION ”
IN MAURITANIA

PRODUCTION
CENTER

Our CEO, Esteban Xam-mar was present as a volunteer in the **1st DentalCoop/ HumanCoop Commission** in Mauritania. As part of the team of dental prosthetists who composed the expedition, they placed prostheses to improve the dental health of the patients they assisted. We feel very proud of our CEO's work in this expedition, something that reinforces the commitment of **Dynamic Abutment Solutions** to making the world a better place.

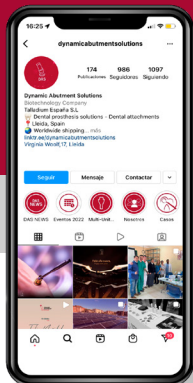

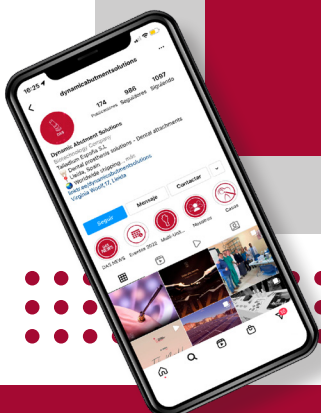

It all starts here, in our **Production Centre**. Here we shape the ideas we develop day by day, with multifunctional equipment which allows us to prototype quickly, choosing between any bio-compatible material that exists in the market to make the best final product.

Our multi-axis machining equipment allows us to obtain the complex geometries that our designs demand in order to achieve the fit and perfect precision of your dental restoration.

Dynamic Abutment Solutions, in addition to being a manufacturer, is also your digital partner and will be on your side throughout all your work protocol, adapting to your needs.

At DAS, our commitment to doing a good job extends to ensuring an efficient and sustainable use of resources in all activities. To this end, most of the electric consumption of our Production Centre already comes from photovoltaic panels installed in our headquarters, and recyclable and environmentally friendly materials are used.

From **February 1st to 3rd** we will be at **AEEDC exhibition in Dubai** where we will present a new project on guided surgery. Visit our booth and get to know all the novelties of **Dynamic Abutment Solutions**.
